

Figure 1: Influence of ER α - and ER β - selective ligands on ovarian wet weight in hypox immature Wistar

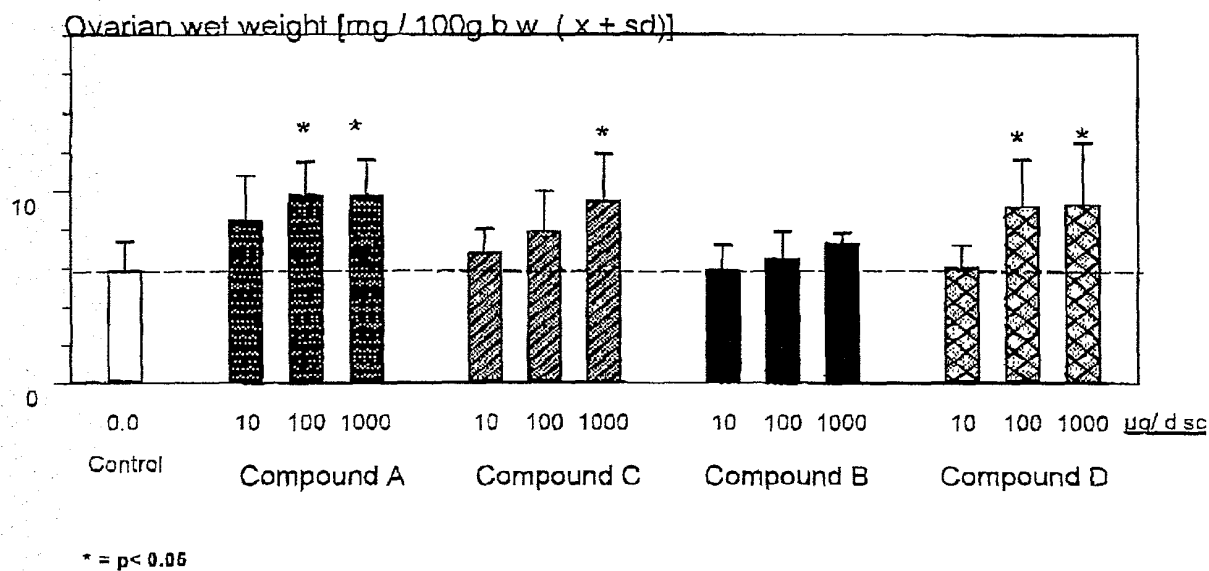

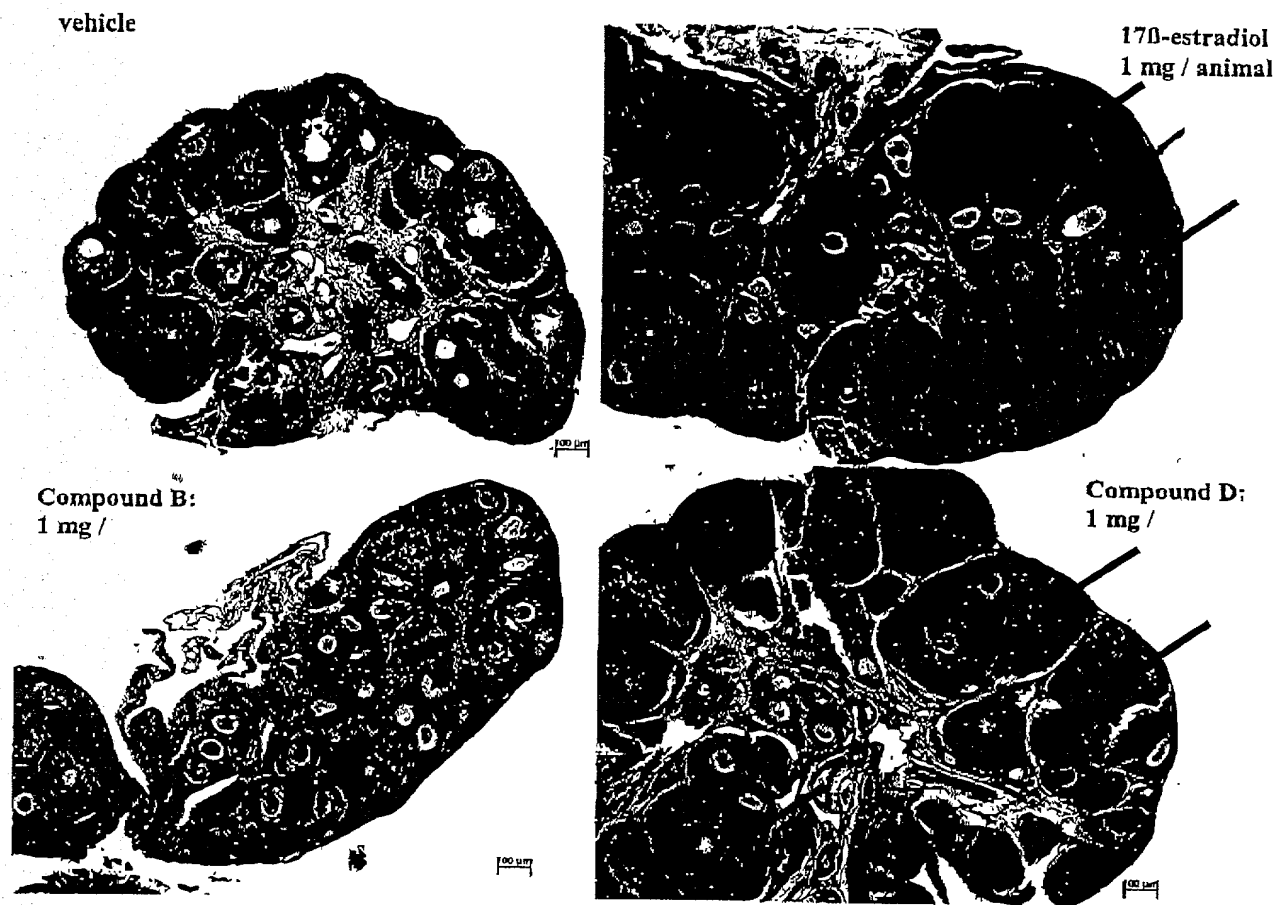

Figure 2: Influence of $ER\alpha$ - and $ER\beta$ - selective ligands on folliculogenesis in hypox immature Wistar rats

Histological sections, stained with hematoxylin and eosin, of ovaries treated with vehicle, 17β-estradiol, an $ER\alpha$ -selective ligand (Compound B) and an $ER\beta$ -selective ligand (Compound D) are shown. *: atretic follicles, arrows: large preantral follicles.

Figure 3: Influence of ER α - and ER β -ligands on Folliculogenesis and Ovulation-rate in the HYPEX Immature Wistar Rat
